

WEB SECURITY BOOTCAMP

Action-packed days of hands-on defense skills that hold up against *real attacks*.

A fully packed bootcamp where your team switches sides — attacker one moment, defender the next — against a deliberately vulnerable application running in a browser-only cloud lab. No installs. No slideware marathon. Just the defense patterns your codebase is missing.

WHAT'S COVERED

- **OWASP Top 10:2025 — end-to-end**
Injection → RCE, XSS in every context, SSRF, deserialization, auth bypass, session attacks, file upload traps — each mapped to the defense pattern that stops it.
- **OWASP API Security Top 10**
BOLA/BFLA, mass assignment, JWT pitfalls, rate-limit gaps — with the server-side mitigations your framework already ships.
- **LLM & Agentic AI Top 10**
Prompt injection, RAG corpus poisoning, MCP tool abuse, agentic goal hijacking. Optional module — turn it on if your roadmap touches AI.
- **AI-Generated Code Security**
Reviewing Copilot / Claude Code / Cursor output, secure prompting, automation bias. Because your team is already shipping AI-written code.
- **DevSecOps automation**
SAST / DAST / dependency & config scans wired into a live CI/CD pipeline — false-positive handling included.

HANDS-ON CLOUD LAB

Each participant gets a personal vulnerable web app spun up in my cloud. Browser only — no installs, no VPN drama, no "doesn't work on my machine". Docker bundle goes home with them for lifetime recap.

PARTICIPANTS RECEIVE

- Personal cloud training environment
- Full slide deck & exercises (PDF)
- Lifetime access to GitHub + DockerHub repos
- Signed Certificate of Participation
- Email support for setup & follow-up questions

WHAT PARTICIPANTS SAY

"Every developer should have taken this training at least once."

— Training Organizing Team Lead

"In all the years this is one of the best trainings I've attended."

— Training Participant

Let's scope your team's bootcamp.

Every engagement starts with a free scoping call to tailor agenda, stack examples and internal guidelines. Smaller teams: join my public event.
